EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- In claim 9, line 15 --by-- has been inserted after "signal."

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

- With regard to claim 9, as the closest reference, a combination of AAPA (Applicant Admitted Prior Art) and Morikawa et al (US 5,267,105) shows a controller provides a rotation speed signal; **but fails to show** that the driving unit of step (a) is detected by transforming a sine wave signal generated by the driving unit into a series of pulse signal with intervals.
- With regard to claim 16, as the closest reference, a combination of AAPA (Applicant Admitted Prior Art) and Morikawa et al (US 5,267,105) shows a controller generating an open signal to actuate a cover to enter open state; **but fails to show that** it happens, as the intervals of the pulse signal are larger than a predetermined interval.
- Applicant asserts that this system would ensure the lifting up of the CD cover being under a safe state to reduce time for lifting up (Specification, p. 2, lines 26-28).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
